

# TEAR THROUGH TEAR OFF!

## SAVE TIME, MONEY & LABOR!

- One-person setup, 15-minutes or less, no assembly required.
- More flexibility for dumpster location with folding lower chute.
- Extends over landscaping and other obstructions around the building.
- Position up to 32-feet away from building.
- Large hydraulic operated upper hopper that adjusts to rooflines.
- Extends up to rooflines 30-feet high.
- Durable poly-liner inside hopper and chute to sustain impacts.
- Perfect for the removal of tile, ballast, sheet metal, asphalt & more!

## EFFICIENCY

- Telescoping design creates a compact unit for easy transport and setup
- Trailer mounted for easy transport
- Save time on set up and tear down
- Minimize need for fall-protection tie-off so every load happens faster
- Totally enclosed chute means nothing misses the dumpster
- Convenient all-in-one control panel on base unit

## FLEXIBILITY

- Folding lower chute adjusts to dumpster size and location
- Hydraulic upper hopper adjusts to rooflines and provides large opening for debris (4-feet wide)
- Self-leveling hopper supports can clear parapet walls
- Adjustable outriggers provide leveling and safety on uneven terrain
- Can reach roof heights up to 39-feet
- Up to 32-feet of clearance between base unit and building

## DEPENDABILITY

- Non-stick, durable high-density poly chute is virtually self-cleaning
- Heavy-duty, corrosion resistant aluminum construction of primary parts
- Inside of chute lined with UHMW to absorb impacts from debris
- Powder-coated steel trailer and lift mechanism
- Batter operated hydraulic lift system with integrated charger
- Unique, one-of-a-kind design, U.S. patent number 9,555,968
