

MEET THE NEXT GENERATION OF POWER

INTRODUCING THE NEW AND IMPROVED 2026 EQUIPTER ENGINES

The **2026 Equipter 4000** model is now powered by **Honda's iGX390 engine**—a revolutionary upgrade that blends power, intelligence, and proven reliability. With integrated electronic control (ECU) and auto-choke technology, this engine delivers consistent performance in every condition—**no manual throttle or choke required.**

REFINED CONTROL

Manually adjust engine speed with the **redesigned throttle control.** The iGX390 engine offers precise throttle control and faster response for smoother operation.

COLD-WEATHER READY

Equipter testing confirms **easy starting even in single-digit temperatures,** so you can get to work—no matter the season.

FUEL EFFICIENCY

Engineered for efficiency, the iGX390 delivers up to **15% better fuel economy** than comparable engines—saving you time and money on every job.

QUIET, CLEAN OPERATION

A redesigned muffler and precision-engineered components **minimize vibration and reduce overall noise,** ensuring a quieter jobsite experience.

NEW Throttle Control
NEW Electric Start

UPGRADED CONTROLS. UNMATCHED EASE.

The redesigned control system complements the iGX engine's advanced features, offering **intuitive operation and smoother throttle response.**
